## iSweep

Thanks to the new form-fitting construction and the use of new self-lubricating sliding materials the reliability and durability of the driving clutch will be increased significantly in comparison with today's well-known and proofed Haaga system. External influences, such as dust, dirt and wetness will not affect the function.

### Your benefits at a glance:

- dirt resistant
- maintenance-free\*
- robust and durable

\*except wear parts

- The specially developed driving clutch ensures high reliability
- Thanks to the form-fitting construction, any kind of external influences, such as dust, dirt and wetness will not affect the function.
- The worm gears (battery driven models) and tooth sleeves are made out of a new self-lubricating sliding material and ensure longer lifetime.
